

# Radar & Laser Protection as Advanced as Your Car.

## **The Newest Protection Technology on the Planet.**

Only CALIBRE Radar & Laser Protection Systems incorporate breakthrough wireless technology. That means, with its own independent wireless network, CALIBRE not only protects you from speeding tickets, it protects your car's complex electronic system and your new car warranty.

## **Wireless OneTouch™ Remote Control.**

Only CALIBRE is controlled with a hand-held remote about the size of your car's key fob, and as easy to use. Select these modes: On/Off, City/Highway, Voice/Tone and Volume/Mute with a single click, then put your Remote Control away until you want to change preferences.

# CALIBRE™

RADAR AND LASER PROTECTION

## The Best Guarantee You Can Get!

### **100% immunity from speeding tickets!**

We'll pay any and all radar speeding tickets you get for one year after purchase. No manufacturer of ordinary detectors dares offer this protection.

### **100% performance guarantee!**

If your new CALIBRE Radar Detection System does not outperform any other radar detector you've owned, return it within 30 days for full product credit.

### **100% protection against theft of the unit!**

If your CALIBRE is ever stolen anywhere, under any circumstances, we'll replace it at no cost to you. Just provide us with proof of purchase and a copy of the police report that was filed.

### **100% 3-year quality guarantee!**

We're so sure of CALIBRE's quality that we've *tripled* our warranty! We'll pay for any and all repairs or replacement of defective parts for *three* years after purchase.

RADAR AND LASER PROTECTION

**K40**  
ELECTRONICS

Finally,  
Stealth Technology  
goes *Wireless*.

## **It's a Wireless World. Your Computer. Your PDA. Your Cell Phone. And Now CALIBRE.**

K40 has entered the new age of wireless connectivity, where you get all the benefits of the most powerful radar and laser protection without the cables and wires required by any other system.

# Totally New Technology. Inside and Out.

## It Started with an Idea.

We set out to create a state-of-the-art radar and laser protection system that would maximize your driving pleasure and minimize your need to interact with the system. What we developed is a system that revolutionizes every aspect of safety from speeding tickets.

## Dual Wireless Radar Receivers.

CALIBRE's exclusive, patented design mounts separate wireless radar receivers behind the front grill and rear bumper ~ strategically positioned for the fastest capture of radar signals. Distinct audio (verbal or tone) and visual alerts let you know exactly when and where to look for police.

## Datadyne Technology.™

Not satisfied with earlier capabilities, we completely redesigned our computer-controlled superheterodyne radar receivers. Now you get a significant increase in sensitivity and consistency to all police radar frequencies, especially the newer DSP Ka band radar guns (the most significant threat to motorists today).

## Wireless Eliminates Cables and Big Holes.

Every other installed radar device requires drilling holes to run cables through your firewall. But since CALIBRE uses wire-free technology, your firewall -- and your warranty -- remain intact.

## Wireless, OneTouch™ Remote Control

Only CALIBRE offers these unique one-click technologies as standard features:

- Easy Mute™ for prolonged radar encounters
- City/Highway Mode
- Voice/Tone Mode
- Volume/Mute

# You're Safe From Every Angle. Guaranteed.

## Custom Warning Display

You can see it. No one else ever will.

## Front Radar Receiver

You see them long before they see you.

## Rear Radar Receiver

Protects you from every kind of radar.

## Laser Defuser® EX

The next best thing to invisible!

## Total Radar Protection...

CALIBRE detects all FCC allocated police frequencies including X, K and Ka Superwide. Also, VG-2 Stealth Guard™ passively and actively conceals your system from a police VG-2 Gun (radar detector detector).

## Total Laser Protection...

With an optional Laser Defuser® EX or EX2 you'll deactivate police laser capability by emitting a powerful infrared signal back to the gun at a pulse rate the gun can't understand. It actually deactivates the ability of the laser gun to measure speed, while you receive audio & visual warnings that give you the precious time you need to react and reduce your speed.

## ...At the Touch of a Button.

**Highway Mode:** Full sensitivity and warnings to all FCC allocated police radar bands and technology.

**Advanced City Mode:** Eliminates all X-band warnings while also reducing other non-police radar signals.

**Voice Mode:** Audio quality digital voice alerts indicate the direction of the signal and the radar band detected (e.g. "FRONT KA BAND" or "REAR K BAND").

**Tone Mode:** Provides simple tone alerts for each radar warning indicating whether the threat is to the front or rear.

**Volume/Mute:** Adjust volume to High or Low setting, or activate full time Mute which provides visual light warnings only.

**Easy Mute:** Quickly mute any radar warning with a single press of any of the three buttons on the OneTouch™ Remote Control.

## So Discreet, CALIBRE Looks Factory Installed.

No inconvenient, unsightly cords! CALIBRE's tiny but effective blue LED light points (or pods) become a vital part of your instrument panel.

## Designed, Built, and Installed by Professionals.

CALIBRE Radar and Laser Protection Systems are available only through select auto dealerships and auto electronics stores. They're the people who know your car, know the CALIBRE system and the importance of proper installation.
