Extraordinary Power
Lets You Keep Your Mind on the Road.
And Your Money in Your Pocket.

Intermediate Frequency Rejection Technology™ rejects common sources of false alerts caused by intermediate frequency interference.

Unique "S-Window" Design helps this detector pick up laser signals from front and rear.

Power Jack connects you to any 12.6 v DC negative ground system. That's any car.

Mute Button switches audio alert from continuous tone to clicking sound and back. Where there's a lot of clutter, the quiet is nice.

Filter Button reduces extraneous radar signals so you can concentrate on the real threats.

Red Alert Lights confirm laser signal and strength of radar signal so you can hit the breaks with time to spare.

Red and Amber Lights alert you to the individual radar bands so you know what type of threat you're facing.

Red Light alerts you to laser gun. You'll know in an instant that he's there.

Green Light indicates when filter mode is engaged.

Power-On Light indicates unit is receiving power.

Audio Alerts sound separate warnings for each radar band and for laser. You can see the alerts and hear them, too.

Power Volume Button activates unit and switches on an audio/visual test pattern. With all systems go, you're ready to roll.

Dim Button controls brightness of all lights for easier viewing during night driving.

Get the RD850 Circle of Protection™
Only the RD850 gives you all-band radar and total laser protection from the front - the rear - and even senses side signals that aren't dead ahead or behind.
